Sails

The Competitive Edge

Sirius Sails continues to support all of the AMYA Classes as well as several International classes. We custom make every suit of sails to meet or exceed the skippers expectations. We offer the widest variety of sail materials to choose from to meet the needs of the skipper's requirements. For the Soling 1 Meter we offer several different Class Approved materials for use on your new Soling 1 Meter.

We continue to carry the MK200P which is a 1.96 sm oz rip stop that we've had as the stock material. We have recently added several lighter weight materials for use as a jib or a light air suit. We have added the MK70P which is a 0.81 sm oz rip stop and we also offer several colors of the iCarex 31 which is a 1.09 sm oz rip stop. All of these materials are class approved.
