Cheers

From the Harbor Master

Ahoy! Welcome to spring time and the opening new season at the park to float our boats. The warmer weather should have you itching to get out there. Get out of the house and, away from those honey dew lists and the everyday pressures of life. Come relax, sit back and talk with friends and run some of your toys. We are all kids at heart. Some kids play better with others. So come out and play. ARRRR.... We had a very nasty first club day, weather wise, in March. Only a few of us diehards showed up. Or you may call us the stupid ones. Anyways, we did have lots of fun, cold feet, hands and all. When we weren't trying to warm up our frostbitten

Club's Winter Meeting

I'd like to thank Doug and Sondra Smock for hosting another wonderful Winter Club Meeting. The food was great and so was the company, and the Smock residence is a great place for this event. We had plenty of room for gathering up stairs to enjoy food and friends and there was ample room down stairs in Doug's shop to display models and talk shop. We got to see some new projects from John Antonides's model of the Boat from the Carry Grant movie Father Goose in it's early stages, Matt Spade's Dixie II Gold Cup winner, to Rick Lesinszki's Russian Typhoon & German 212 Submarine models. A great time was had by all.

ears and jumping up and down trying to keep warm, we ran some impressively fast boats. For the first time ever we had four MAJOR Rooster-tails running at the same time in our lake. No pictures however since we were all driving. Also we had an Airbrush class, thanks to Rick L. for the great class, the experience and hosting it at his house. And lastly, a few of us went again to Valdosta Ga to run some Saw Racing. So sit back, kick off the CA, and take a load off. Enjoy. Hopefully next month some more scale and sailing news and pictures.

Next Meeting is April 21 (Saturday) 11:00 AM - 3:00 PM (Crackerbox Racing at 10:00 & 10:30 AM) Diehards till dark. Info:

Aaaaaaaaarrrrrrrr,
Corsair Pirate Chris

Club Airbrush Class

Rick Lesinszki and family were kind enough to let us come over and play at their home. I mean learn. Learn airbrushing. Rick, a self taught airbrush artist, who doesn't take enough credit for his artwork and abilities taught us some of the basics of airbrush work. He's been selling his fancy artworks online for helicopter canopies and has even taught his wife to help paint. Moving on, he is now getting into the FE boating world. The classes were extremely tough, and rigorous. Just kidding. We even had a helicopter flying demonstration. Thanks Rick. To see some of his artwork go to <http://www.rickosplace.com>

Harbor Master Chris' Harbor

Matt's Dixie II Gold Cup Winner

The Superman Boat, it is a bby hull, speedmaster trim tabs, finedesignrc hardware, and a 5000 kv motor. It should fly and just on 6 cells.

Tom Eagle's Harbor Repair

Tom Eagle designed and built this handy "Ship Repair Service and Supply Cart" It will contain almost everything needed for steam boating, including batteries, distilled water, fire extinguisher, lantern and an umbrella. Sorrv no Hotdogs.

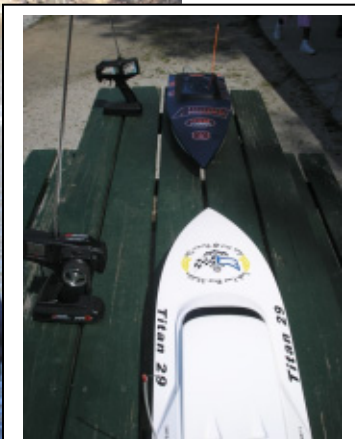

This is how we set out the buoys

Doug's Den

South East Amp Hogs

The Club's FE group is growing. Thanks to the VP of FE, the club has 4 very fast boats that run 50 mph+ and throw rooster tails back approximately 25 feet or more. For the first time, all were in the water at the same time. Really setting the lake on fire. It was a cool site to see, and it was definitely a crowd pleaser. Can't wait for next months meeting and hopefully a 5th boat.

Doug's Titan29 and Chris' Whooped

See what you started? No, you started... No...

Ok, in the last newsletter I happened to mention that my girlfriend beached my slower boat. Now that the grief, that I have received has subsided, from said girlfriend, I have to mention that beaching my own boat does not count. Especially, if it is upside down and it bounced 3 times to get to the said beach. I really did plan it that way. I wanted it to be close to the beach when it accidentally flipped over because of the turtle that jumped up and struck the rudder. This way I could just walk over and pick it up easier. How's that? That's my story and I'm sticking to it. Oh yes, I also have to say in my defiance, that I was

distracted by yes a Mister Mister. Here it is, opening day of the boating season, freezing cold, no one at the park except a few of us FE guys doing some testing, frost coming off our noses, and who do you think appears. No. Not a club member. No, not the girlfriend. Yes, it is, none other than, Library Larry. Did you guess it? Now, you may ask yourself, do you feel lucky? Huh? Punk? What are the chances of running into him, library card in hand, in the freezing weather, at the park and exactly during the time of my run? We will have to see next month. Coincidence or conspiracy? Hmmm... We may never know.

Shop Contest

Here are the rules, until I come up with better ones. Right now, send me up to 4 pictures of your boat-building workshop in one email with the subject of "Your Name Workshop". Pictures should be no bigger than 640 x 480. I will be doing the judging, and the Categories are secret. Best, Worst, etc... This may not be an easy task for some because of their small or large multiple workspaces. We have all worked on our kitchen table; so therefore do not send pictures of your kitchen or living room floor. It must be a boat-building workshop and pictures may get published. Send them to me at cgski@bellsouth.net Due by April 25th,2007 Prizes will be awarded.

Phil's FE Corner

*Top Banana Runs Again!
Phil has final brought the ole' banana out of storage. Now he has no more excuses...*

First Damage of the season, Thanks Phil
