Use 6 small pieces of Velcro to secure the 2nd Deck to the Deck. The two pieces at the center will help prevent

Trim the Lower Pilothouse as marked. Cut straight-across under the stairs. Cut the top carefully to avoid cutting the side of the pilothouse.

Center the Pilot House on the 2nd Deck and mark with tape as before. Trim and install 3rd stairs. Secure the Pilot House with 4 narrow pieces of Velcro as shown.

Trim the Roof and cut 4 small 1/4” pieces of Velcro.

Mark the center of the 2nd Deck for the Stack. Center the stack and with a fine pencil, outline it on the deck.

Sand the bottom of the Stack and the spot where it will attach. Support the deck with the wood block. CA the stack to the 2nd Deck.

Unfold and distribute the 36 clamps around the hull. Put a continuous thin 1/8” bead of medium CA on top of the flange. Use your finger to guide the tip of the bottle of CA. Thin plastic gloves would keep the CA off of your fingers.

Set the deck squarely onto the Hull. Put one clamp at the center of the Bow and Stern. Align the sides quickly (if you didn’t use the books in figure 88) with 3 clamps on each side. Then clamp next to where the hull changes angle (↑). Fill in with the rest of the clamps.
